SUMMARY

Junior Flutter Developer and final-year IT student with hands-on experience building cross-platform mobile applications using Flutter and Dart. Developed multiple personal learning projects focused on responsive UI, state management, and application architecture. Familiar with GetX, Firebase, Supabase, Git/GitHub, and integrating AI APIs for learning and experimentation. Passionate about continuously improving technical skills through hands-on projects, open-source learning, and internship opportunities.

EXPERIENCE

- Built 7+ cross-platform Flutter apps for mobile and web
- Developed e-commerce style applications with modern UI
- Integrated Firebase/Supabase for backend features

INTERESTS

- Full Stack Dev
- AI Automation
- AI Agents
